- Rails
- SCSS
- Python
- Three.js
- HTML
- Git
- Github

PROJECTS

JOLT EDUCATION

Using React, Node.js, and MongoDB, I am building a chrome extension to help teachers generate short topic summaries in video format and place into their curriculum

3D RESUME

Using React Three Fiber, I created a scene to display my resume in a 3d environment.

GRASSROOTS

Working with a team, I built and designed the application interface for a artist-facing application using the Spotify API.

DEFIT.

Fullstack project Airbnb-style home gym rental application using Ruby on Rails.

FILMY-J

Utilizing Ruby on Rails, I built this whole application allowing film photographers to document film photo settings while going through each roll to learn film photography.

AV TECHDADDY

While in my previous role, I built a HTML, CSS, JS website functioning as a knowledge base for all of the technical equipment used within the operating rooms. My exciting starting point into the tech world.

PROFILE

Fullstack web and 3D developer with a passion for technology and business. Skilled in front-end and back-end development, and motivated by continuous learning and collaboration. Seeking new challenges in in all aspects of tech.

EDUCATION

FULL STACK WEB DEVELOPMENT

Le Wagon Program, Bali, Indonesia

Sept. 2022 - Dec. 2022

BACHELORS OF SCIENCE

University of Iowa
